

OLEVI

The Advanced Power of Coaching

An advanced coach will skilfully use progressive strategies and approaches to assist others in defining what needs to be achieved, clarifying and valuing why it is important, and creating momentum. You will also learn how to empower commitment to action in colleagues that realises both professional and organisational aspirational goals.

This programme consists of 3 focused sessions with a series of post session challenges, completed over a 4 week period. The sessions are run over a ½ day + 1 day + 1 day format. The programme has been designed for delivery online.

In addition to the Power of Coaching accreditation, full attendance at this programme will accredit you to coach and mentor adults and pupils to improve their learning, leadership and wellbeing; design your own coaching models to fit your context; and be empowered to lead a team of coaches in developing a coaching ethos.
